# MAGNETIC POWER

In MRI - Magnetic resonance imaging gives us a helpful look inside the body

## The Earth's magnetic field is suffering!

Our planet is enveloped by a huge magnetic field. This ensures that cosmic radiation is kept away from the Earth. This has protected it for thousands of years and made life possible.

But in the last century, **the power of the Earth's magnetic field has diminished by 10%.**

## Why magnets are important for you

So we are constantly surrounded by a huge magnetic field. The power of magnets therefore has a strong influence - often unconsciously - on the life of all living beings on earth:

- The earth's magnetic field protects us from radiation.
- Migratory birds can sense the magnetic field and use it to navigate.
- The red blood cells that supply our bodies with nutrients contain iron. A magnetic metal.
